

Job Description

Field Service Technician

Are you interested in technology, and have an aptitude for electronics or mechanics? Do you want to be part of a young, rapidly growing, privately held company where innovation is more than a buzzword? Does a company which focuses on high-quality client experience and value creation match your passion?

The following will appeal to the **Ideal Candidate**:

- The gratification of a job well done comes from the **satisfaction of your clients**
- You work more for the client than for yourself, while staying true to your **values**
- It's in your nature to do less but do it really well and always **deliver** what you promise
- Your **passion**, outgoing personality and self motivation drive who you are
- You like to be **part of a team** much more than to be by yourself
- Your strengths come from **collaborating** with others
- You have **no boss**, but a mentor and guru, that guides you to master your skills and will expect you to outshine him/her in the future
- **Kaizen** applies to you because of your relentless drive for improvement
- You work hard yet you find time to rejuvenate and **have fun in your workplace**
- You love **quality**, yet you do not fall for the shining superficial stuff that pretends to be better
- You are **curious**, creative, biased for action and love solving problems

As a **Field Service Technician** you will report to the Field Services and Client Services team lead, interact extensively with the Field Services and Client Services team members, and provide customer service to support our growing client base. You'll;

- Install, troubleshoot, diagnose and repair ambyint supplied equipment
- Work with clients to understand their technical problems and requirements
- Follow safe work procedures and provide service documentation as required
- Maintain an inventory of critical components and parts
- Nurture and manage ongoing relationships with field operators and field foremen by continuously demonstrating that we are working in their best interests, to their satisfaction, and as per their expectations

Specific Skills and Requirements we're looking for:

- 2-3 years of oilfield experience, specifically in artificial lift equipment, VFD and oilfield instrumentation
- Ability to build good long term business relationships, both internally and externally
- Excited by new technology
- Desire to develop strong technical knowledge of oil well optimization services/technologies and/or operations
- Ability to work independently with strong self motivational skills

About ambyint

ambyint's solutions lower lifting costs and increase production from oil wells operated with reciprocating artificial lift. We assist producers with optimization of horizontal and vertical wells on new drills and existing wells with artificial lift. We are passionate about providing results, skilled and knowledgeable about reciprocating artificial lift systems and have the best, ambyint built, web-based tools and well automation hardware at our fingertips.

ambyint is an organization guided by a set of core values. Transparency, collaboration, and accountability are fundamental to how we operate. In every aspect of the business: from the people that we bring onto our team; to the space we've designed to work in; the tools we use to function; we embrace these values to guide us forward.

Let us know why you're interested in joining our team and submit your resume to **pickme@ambyint.com**.

ambyint inc. is a wholly owned subsidiary of PumpWell Solutions Inc.
